about us

Concord is a Toronto-based lighting design and manufacturing studio founded by Kate MacNeill in 2018. ConCORD's mission is to create sophisticated, high quality custom light fixtures and to be a trusted partner for designers and trade professionals in their pursuit of exceptional lighting.

Working closely with a team of local manufacturers, Concord is proud to create pieces that are 100% Canadian made. We design, prototype and build in our Toronto studio, while our team of local manufacturers produce custom parts. Each of our fixtures combines traditional manufacturing methods along with the use of leading edge technology.

Concord has led the design development and manufacturing of feature fixtures for high-end residential, hospitality, and commercial projects.

Please contact us for a studio visit.

septa at ultra, 2023
Septa is a series of modular, jewel-like pieces that can be interconnected and styled into various forms while providing alluring accent illumination.

cone at prime seafood palace, 2022
shade: 22 x 8"

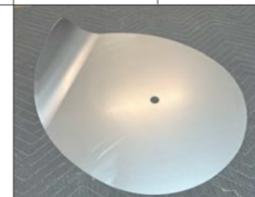

alder in white rock, 2023

The Alder chandelier utilizes varying diameters of steel tubing to create a branching frame. Slumped glass diffusers and a sandcasted canopy juxtapose the linear forms to create a balanced composition.

florette process, 2023

custom project process, 2023

cone at prime seafood palace, 2022

The Cone pendant is based on the most basic of geometric shapes. Spun from solid brass, the shade has a low and wide profile. The conical pendant adds definition and focus to any room.

beacon at lune 1860, 2019

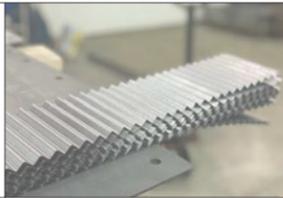

The Beacon wall sconce is a simple but striking fixture. The globe emits a warm glow over a beautifully finished plate of brass.
